

FireAde® CLIMATE CONTROL PRE-MIX

Green Agent Technology™

- ▶ **Environmentally Formulated**
- ▶ **Organic Compounds**
- ▶ **Zero Hazardous Chemicals**
- ▶ **Encompasses Water Based and Food Grade Ingredients**
- ▶ **Contains no ingredients reportable under the Superfund amendments and Reauthorization Act (SARA) Title III, Section 313 of 40 CFR-372 or Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA).**

FireAde® Climate Control Pre-Mix is a specially formulated blend of the most complete firefighting foam agent and the unique proprietary FreezAde (not an antifreeze additive) that substitutes water. This blend achieves lower temperature suppression without causing instability in performance of FireAde® concentrate. Extreme cold applications of FireAde® concentrate will no longer be a concern. Pumps, CAFS, tanks and extinguishers will be protected year round without any freezing issues. Just as a reminder the pre-mix is a ready to use product with NO dilution required.

Specifications

Features

- Suitable for use with all standard firefighting equipment
- Suitable for ALL classifications of fire
- NON TOXIC**
- NON CORROSIVE**
- NON HAZARDOUS**

Applications

- Coal/Power Utility Facilities
- Pulp & Paper Industry
- Refineries/Petrochemical
- Tank Farms
- Motorsports Crash Rescue
- Dock/Marine Tankers
- Truck/Rail Loading and Off-Loading Facilities
- 1.0% on Class A fires as a wetting agent.

Certifications FireAde®

- UL/ULC Listed Foam Liquid Concentrate (UL File EX6296) (UL162/NFPA-11, NFPA-16) (Updated: 6-28-2017)
- UL/ULC Listed Wetting Agent (UL File EX6296) (NFPA-18/2017) (Updated: 6-28-2017)
- MPA Dresden Listed
- Performance Level "B" per International Civil Aviation Organization (ICAO), (Certificate # 20160544-2)
- Performance Level "C" per International Civil Aviation Organization (ICAO), (Certificate # 20160544-3)

Freeze Protection Properties

This Pre-Mix has the unique ability to remain fluid at negative **-40°C degrees**. The temperature suppression enables FireAde® concentrate to be delivered on demand in the harshest of winters or the most frigid of climates year round.

-40°C
