

Protect. Extinguish.

SAFETY
FIRST

Enforcer[®]

Enforcer Compressed Air Foam (CAF) systems provide rapid response to fire emergency and dangerous fuel spills. CAF systems install easily to small or large vehicles to provide rapid and effective first response to fires on site, at warehouses, and in hard to reach locations. Enforcer units are available from 2.5 gallons to 200 gallons and provide outstanding foam expansion with just a little FireAde per gallon of water. With a constant 150lbs of pressure from the tip, Enforcer and FireAde work together not only to blanket a fire and rapidly cool hot temperatures, but also to render Hydrocarbon fuels non-flammable.

FireAde is available in a Class A&B formula, an AR (alcohol-resistant) formula, and in a pre-mixed Climate Control formula that will not freeze in temperatures down to -40C degrees.

- FireAde[®] rapidly cools down the parts, allowing you to start work on trucks quickly and avoid delays.
- Applying FireAde minimizes burn risk to service technicians during service projects
- Safe to use on all hot surfaces
- Non-corrosive, non-toxic. Washes clean with water
- Superior fire extinguishment
- Made in USA

Protect. Extinguish.

**SAFETY
FIRST**

ENFORCER®

The Enforcer is an extremely versatile portable firefighting system that utilizes high energy compressed air foam technology. Enforcer One recommends using **FireAde²⁰⁰⁰** products which hold approvals with NFPA and UL.

FireAde 2000 – Class A and Class B Firefighting Foam

- Superior cooling
- Unmatched Extinguishment
- Longer lasting foam blanket

UL listed and certified

FireAde 2000-AR – Class B Alcohol Resistant Firefighting Foam

- Unmatched Performance with alcohols and solvents (spills or fires)
- Industrial strength foam blanket

UL listed and certified

FireAde 2000 Freeze Protected Pre-Mix

- Ready to Use
- No Mixing necessary
- Freeze Protected to -40C
- Recommended for all extinguishing systems

VaporAde – Quickly suppresses explosive vapors

- Degasses tank and pipeline internal atmosphere
- Breaks down hydrocarbon sludge
- Emulsifies flammable liquids
